

TRUST YOUR SENSES.

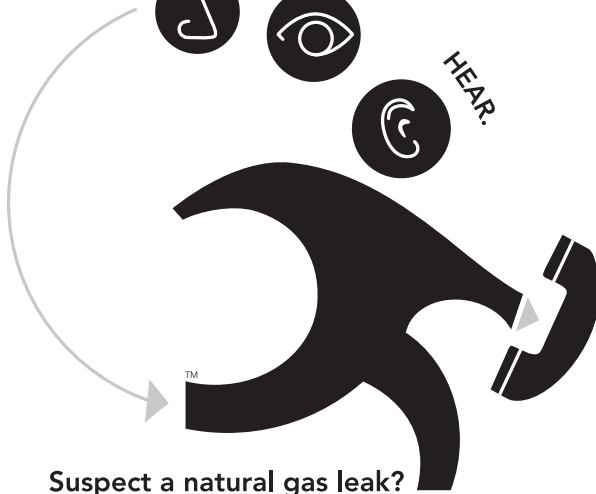

SMELL.

SEE.

HEAR.

Suspect a natural gas leak?

First, move your feet!

Then call when you're down the street.

To help you **SMELL** a leak from a gas line or appliance, a familiar odor like rotten eggs is often added to natural gas. Or you might **SEE** blowing dirt, bubbling water, or an unusual area of dead vegetation. A leaking pipeline might also make a hissing sound you can **HEAR**.

Remember to call the Ohio Utilities Protection Service (OUPS), 1-800-362-2764, at least two working days before digging on your property. If you ever suspect a leak—walk away, right away. Once clear of the area, call your local natural gas company or 9-1-1.
